Experience

CURRENT

SOFTWARE ENGINEER (Frontend Developer) - ONSITE JOB - TECH EMULSION 2024 - 2025

Currently doing onsite job as a Software Engineer at Tech Emulsion.

Projects

1 . https://podbcn.techemulsion.com/

In this project, I worked as a Frontend Developer, building a component where users can create an account and add all their social media links in one place, making it easy to share multiple profiles at once.

2 . https://www.rains.com/

This is an e-commerce platform selling products like jackets, purses, and other items designed specifically for rainy weather. In this project, I worked extensively on the frontend to enhance the user experience.

3 . https://mrbookpeshawar.com/

This is an e-commerce platform for ordering a variety of books. Designed to provide a seamless shopping experience, I worked on the frontend to enhance navigation and ensure a smooth user interface.

4 . https://heritage-walk-footer-nextjs-project-eccomerce.vercel.app/

An e-commerce platform for "Heritage Walk Footwear" specializing in Peshawari and Charsadda chapplas. Built with Next.js, using Stripe, Firebase, and Sanity for payments, authentication, and product management. I worked on both frontend and backend.

FRONTEND DEVELOPER - TECH PIONEER 2023 - 2024

-8 months work experience at Tech Pioneer as Front-End Developer, where I collaborated on several projects, contributing to their design, development, and implementation.

Expertise . .

- FramerMotion
- Vuetify
- MongoDB
- Node js
- Express js
- Firebase
- Sanity
